

11 May 1983

MEMORANDUM FOR: Deputy Director of Information Services

FROM: Chief, Classification Review Division  
Office of Information Services

SUBJECT: CRD Production Statistics for the  
Period of April 1982 to April 1983

1. The following are the statistics for the 13-month period that I have been Chief of CRD, April 1982 to April 1983. They are broken down by category and are explained or clarified with comments as thought necessary.

2. CRD Statistics:

a. Systematic classification review program was the major responsibility of CRD until 1 August 1982 when EO 12356 came into effect and the program was suspended for records held by the Agency itself. After that date, systematic review was limited to supporting programs that other agencies continued and namely, the Department of State, NARS, and DOD. In this program, during this 13-month period, CRD reviewed 25,930 documents consisting of 656,073 pages and CRD reviewers spent 4,665 manhours on this task. Of the documents reviewed, we declassified 2.618 percent. To indicate the difference in the production level of systematic review made by the advent of EO 12356, it may be noted that during the period April - July 1982, CRD reviewed an average of 9,813 documents per month under systematic review and for the period August 1982 - April 1983, the average dropped to 370 documents per month. As noted above, the latter figure reflects documents that come to CRD from other agencies that continued to conduct systematic reviews.

b. Employee manuscripts reviewed for the DDA, except for the Office of Security, came to a total of 173 manuscripts consisting of 13,534 pages that required 887 manhours to review.

c. FRUS volumes were received from State which included a total of 2,604 documents consisting of 10,397 pages and required 898 manhours to review.

d. Other review which included U.S. military histories in manuscript form, damage assessment reviews, FOIA reviews, some permanent OSS records, and other ad hoc requests totalled 733 documents consisting of 178,623 pages and consumed 1,913 manhours.

e. In January 1983, CRD began to review released material for input into the Released Information Management System (RIMS). Information significantly relating to classification questions is extracted and written onto data input forms. This activity for the period January - April 1983 covered 55 documents (almost all were published books) consisting of 14,279 pages and took 1,041 manhours.

f. Review conducted by CRD at NARS and WNRC at Suitland covered 601 documents consisting of 10,283 pages and took 81 manhours.

g. In February 1983, CRD began to review Summaries of Agency Employment (SAEs) for all employees leaving the Agency who never served under cover. In the three-month period, February - April 1983, CRD reviewed 56 SAEs consisting of 210 pages which took 70 manhours.

h. Four two-person teams visited the Truman, Eisenhower, and Roosevelt Presidential Libraries where they spent a total of 559 manhours and reviewed 8,300 documents consisting of 24,350 pages.

i. From April to 30 September 1982, CRD had a 13-member OSS review team that reviewed permanent OSS records for declassification. They reviewed a total of 750 cubic feet of material (about 2,000 per foot) and released about 93 percent of it. In addition, they spent 127 manhours reviewing FOIA requests for OSS material and nine manhours at NARS where they reviewed 1,380 pages of OSS material.
